Contents

Volume 29

MODEL SYSTEMS

Cytoskeletal logic: a model for molecular computation via Boolean operations in microtubules and microtubule-associated proteins
R. Lahoz-Beltra, S.R. Hameroff and J.E. Dayhoff (Madrid, Spain; Tucson, AZ; College Park, MD; Dahlgren, VA) 1

Turing structure during embryogenesis
P.K. Tapaswi and J. Chattopadhyay (Calcutta, India) 25

CELLS

Frequency and conditions of spontaneous plasmid transfer from *E. coli* to cultured mammalian cells
D. Heitmann and J.M. Lópes-Pila (Berlin, Germany) 37

SYMBIOSES

A symbiogenetic theory for the origins of cnidocysts in Cnidaria
S. Shostak (Pittsburgh, PA) 49

Announcements 59

Editorial 61

MODEL SYSTEMS

Some computational models at the cellular level
R.C. Paton (Liverpool, UK) 63

Hypothesis: the central oscillator of the circadian clock is a controlled chaotic attractor
A.L. Lloyd and D. Lloyd (Oxford and Cardiff, UK) 77

REGULATION

A linguistic representation of the regulation of transcription initiation. I. An ordered array of complex symbols with distinctive features
J. Collado-Vides (Morelos, México) 87

A linguistic representation of the regulation of transcription initiation. II. Distinctive features of sigma 70 promoters and their regulatory binding sites
J. Collado-Vides (Morelos, México) 105

EVOLUTION

On the origins and early evolution of multicellularity
A.G. Desnitski (St. Petersburg, Russia) 129

Three stages in the evolution of the genetic code
U. Baumann and J. Oro (Houston, TX) 133

CELLS

Insulin-induced enhancement of cell morphological dynamics: non-specific biophysical mechanisms for the generalized stimulation of metabolism?
D.A. Gilbert and G.R. Visser (Johannesburg, South Africa) 143

Cytoskeleton in the archaebacterium *Thermoplasma acidophilum*? Viscosity increase in soluble extracts
W.G. Hixon and D.G. Searcy (Amherst, MA) 151
